

PROJECT CASE STUDY

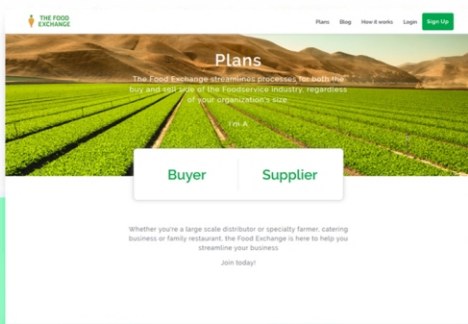

THE FOOD EXCHANGE

The Food Exchange is a technology platform for foodservice industry, enabling buyers and suppliers to do business with simplicity, transparency, and efficiency. It helps the wholesale food buyers like restaurants and super markets to find products and create relationships with new suppliers as well as continue to do business with their existing suppliers – all on one website!

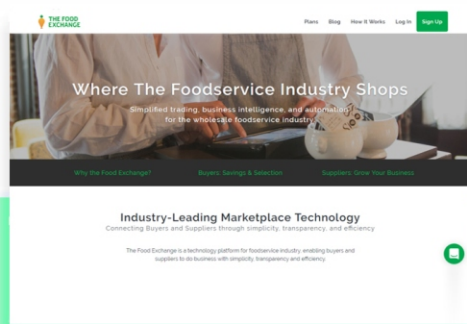

THE BRIEF

The Food Exchange streamlines processes for both the buy and sell side of the food service industry, regardless of the organization's size. From buyers' end, it simplifies the order management and eases the ordering of supplies from multiple vendors with a single click of the button. Rare and gourmet supplies can be easily discovered from new suppliers as well as helps in maintaining relationships and availing special discounts from the existing suppliers. From supplier's end, Food Exchange becomes an essential tool to scale their business by discovering new customers and maintaining the service levels with the existing clients.

The Food Exchange is a technology platform for foodservice industry, enabling buyers and suppliers to do business with simplicity, transparency, and efficiency.

The Food Exchange streamlines processes for both the buy and sell side of the food service industry, regardless of the organization's size.

SUMMARY

The Food Exchange is the online market place that connects bulk food buyers with new and existing suppliers with ease of ordering and discovering new food items with special discounts from suppliers. This technology disruptor is going to forever change the supply chain market in food service industry.
